

Brewery & Winery Insurance Program

Specialized Coverage for the Craft Beverage Industry

The Brewery and Winery Insurance Program provides specialized insurance coverage to address the unique exposures that the craft beverage industry faces. The program is available for craft breweries of all sizes including microbreweries, brewpubs, and regional craft breweries; wineries; and distilleries. Our comprehensive program provides coverage for all aspects of these operations from equipment and production to tasting facilities and special events.

Across the country, the craft beverage industry is experiencing unprecedented growth. More than 8000 wineries and 4000 breweries are in operation across the country, and experts predict that both of these numbers will continue to increase dramatically over the next five years. Our Brewery & Winery Insurance Program was designed to help agents take advantage of the substantial opportunity within this niche market.
